# Syllabus Behavioral and Cognitive Neuroscience NEU402

Summer Semester 2023 Lecture sessions

Instructor: Dr. Charlotte Vanacker Email: <a href="mailto:vanack40@msu.edu">vanack40@msu.edu</a>

Office: BPS, 2<sup>nd</sup> floor, Room 2201G

Office hours: Thursday 2-4pm via zoom. For more extended conversations, please

request an appointment outside of office hours.

**Lecture time**: 10:20-11:40am T/R

**Zoom link:** <u>https://msu.zoom.us/j/9459826115</u>

Meeting ID: 945 982 6115

# Course description:

This course is intended as an introduction to behavioral and cognitive neurosciences with an appreciation for the biological basis of everyday behaviors, such as perceiving the environment, learning, maintaining internal state, and thinking. We will also talk about emotions and cognition. The course is articulated around three big parts: I/ The emergence of behaviors II/ Motivated behaviors and III/ Emotions and Cognition. My background is in Physiology and Neuroscience, therefore we may use some psychological approaches during this class but the main focus is the biology of behaviors. Additionally, you will learn about the physiological correlates of many psychological and neurological conditions, such as schizophrenia, depression, ADHD, autism spectrum and drug addiction. We will use research publications to understand how researchers discovered connections between brain and behavior.

**Prerequisite:** NEU301 and NEU302.

#### Learning objectives:

- 1. Analyze the biological basis (cellular and molecular mechanisms) at the origin of behaviors
- 2. Associate brain areas and pathways with behaviors. Understand how they are involved in the emergence of these behaviors and how behaviors can be affected by conditions and damages.
- 3. Discuss the role of the brain and the nervous system in health and disease
- 4. Understand how various research methods are used to study the biological basis of behavior in human and animal.
- 5. Identify the major neurotransmitters and discuss the impact of each on behavior and diseases.

# Required course material, technology, and tools:

#### Textbook

For this course, you are required to purchase the 'enhanced ebook' online version of the following textbook:

Breedlove, S., M. and Neil V. Watson. *Behavioral Neuroscience* (9th Edition). Oxford University Press Academic US, 2020.

Please access the OUP website directly via this link: <a href="https://global.oup.com/ushe/product/behavioral-neuroscience-9781605359076?q=breedlove&cc=qb&lanq=en">https://global.oup.com/ushe/product/behavioral-neuroscience-9781605359076?q=breedlove&cc=qb&lanq=en</a>

And apply the discount code: **STUDENT23** at checkout

#### Other resources

• Computer with Internet access: Our class sessions will be online. Interactive teaching tools will be used during the lectures (including and not restricted to iClicker, Kahoot, Poll Everywhere, Google Jamboard). You will need your laptop to access pre-class activities, homework, quizzes and exams on D2L (online, see below)

Interactive tools can greatly facilitate learning, but there are also opportunities for misuse. I ask that you take responsibility for your actions surrounding the use of these tools. During lectures, please use your device only for active learning and tasks related to the discussion. Be respectful in your interactions and posts while using these tools.

#### D2L

D2L will be used for class-related material and communication including but not limited to:

- Schedule and Syllabus
- Lecture slides
- Quizzes and Exams
- > Pre-class activities, assignments and homework
- Resources
- Announcements and D2L emails: To ensure that you receive important announcements, you are required to have your announcements setting turned on. You are responsible for information I send to students via D2L Announcements and emails. You are responsible for making sure you have access to your D2L emails regularly (it is highly recommended that your D2L are forwarded to your main MSU email address or any email you use on a daily basis)
- Grades

To access D2L go to <u>Homepage - Michigan State University (msu.edu)</u> or <u>www.d2l.msu.edu</u> and log in with your MSU ID and password.

#### iClicker

iClicker Cloud will be used to interact and answer questions during class. This will help me understand what you know, give everyone a chance to participate, and increase how much you learn in class. This will also provide you with feedback on how well you are comprehending course concepts, help you master challenging concepts, and allow you to review practice questions after class.

- ➤ If you don't have an account with iClicker Cloud yet, you must create one here: iClicker Student Login
- > You can search for Behavioral and Cognitive Neuroscience, NEU402, or search for our course using the code provided in class.
- Note: iClicker is free to use for MSU faculty and students. You should not be prompted for payment. If you have used iClicker Reef in the past, the interface may say that your subscription has expired. However, you do not need to purchase a subscription as long as you are taking courses at MSU. The product should still work. If the product does not work, contact iClicker support at <a href="https://www.iclicker.com/support">https://www.iclicker.com/support</a> and they will help you troubleshoot the issues. If you have paid for iClicker Reef accidentally, please contact iClicker support for help with a refund.
- > Set up the device(s) you'll use to participate in our class sessions. You can download the iClicker student mobile app via the App Store or Google Play, or you can use the iClicker web app by signing in as a student at <a href="iclicker.com">iclicker.com</a>.

For technical difficulties and laptop related assistance contact the MSU D2L HelpDesk <u>Technology at MSU - Help & Support | Michigan State University</u> or visit the computer store on campus.

# General policies, guidelines and expectations:

#### Lectures:

Classes are online synchronous over the summer semester. During the scheduled lecture periods on Tuesdays and Thursdays, 10:20-11:40am, we will meet via Zoom, using the following link: <a href="https://msu.zoom.us/i/9459826115">https://msu.zoom.us/i/9459826115</a>, Meeting ID: 945 982 6115 (no password). Participation in these meetings is highly encouraged but not required. They will be based on inclass activities, group work and lectures and will help you complete the weekly worksheets (see description below). These meetings will complement pre-labs activities that you will be required to complete before attending the lectures (mostly videos and readings posted on D2L). These sessions will also give students the opportunity to interact with both the instructor and other students, ask questions regarding the material and obtain feedback on assignments and exams. Thus, it is in your best interest to attend the lectures. Lectures will be recorded and available on D2L later (usually the same day). Students will be asked to complete an online quiz and an online worksheet according to the posted schedule and will receive credit for the completion of both post-class work. Three online exams related to the material, INCLUDING one final exam on the last day of the summer semester, will be assigned during the semester (see below for details and dates).

#### **IMPORTANT**:

To ensure that I am able to best meet your needs and support you throughout this semester, I ask you the following:

- Communicate with me any changes in your situation or needs during the semester
- Read and complete all assigned material by the posted deadlines.
- Adhere to the 'Environmental health and safety' guidelines: <u>COVID-19 | Environmental</u> Health & Safety | Michigan State University (msu.edu)

# **Course Grading**:

You grade for NEU402 will be calculated as follow:

#### Lecture Grades:

Total Score 450 points

As noted above, students will accumulate points through the semester by completing quizzes, exams and worksheets. The points will be converted to the percentage out of 100 to determine the GPA for the course. Semester grades will be based on the grading scheme below:

# **Grading Scale:**

4.0 = 90% and above

3.5 = 85% - 89.9%

3.0 = 80% - 84.9%

2.5 = 75% - 79.9%

2.0 = 70% - 74.9%

1.5 = 65% - 69.9% 1.0 = 60% - 64.9%

0 = below 60%

#### **Exams Details**

Three exams will be given throughout the semester, including the finals. The Exams will be fully remote, however, they will be accessible during a specific time. It is the student's responsibility to access and complete the Exam during the open period of time announced and to submit it properly. Late submitted work will result in zero credit. The exam content is based on material covered in pre-class, in-class, and post-class activities. Exam dates are subject to change if situations arise during the semester which may require alterations to the material coverage schedule.

Exams are scheduled on the following weeks and are subject to change at professor's discretion:

Exam 1: Week 5, June 15-20 Exam 2: Week 9, July 13-18 Exam 3: Week 14, August 17-18

# Day of exam Protocol

The exams will consist of multiple choice, multi-select, true & false, matching or short answer questions. Exams will be given through D2L and will remain open during a time period of several day. On the last day at 11:59pm, the Exam will close and answers will be submitted automatically for grading. Students are responsible for completing the Exam during the time window.

#### Make-up Exams

Exams will be open for at least 24 hours, allowing you to manage and anticipate your schedule. Known conflicts with exam dates must be discussed with the instructor <u>no less than one week prior</u> to the exam date. Documentation must also be provided no less than one week prior to the exam date. **You are responsible for communicating with me.** 

Known conflicts include, but are not limited to: military duty, athletic travel, court date, etc. Remember that <u>you are responsible for taking your exams and quizzes</u>, and any known absence should be anticipated.

If you cannot take your exam in time for a last-minute reason, contact me immediately. Documentation must be provided within 48 hours of the exam date (or within 48 hours of the date on the excuse documentation). If approved, make-up exams must be scheduled within one week of the exam date. If you miss your scheduled make-up exam you will receive a zero for the exam. Unexcused missed exams (after the 24-hour contact period) will result in a zero grade.

The schedule is **tentative and may change depending on the pace of the course**. Please note that for some book chapters, not all material will be covered in lectures. See the weekly topic schedule below.

#### **Quizzes**

There will be 8 quizzes in total over the semester. There will be one quiz per week except on Exam weeks. These assignments are 20 points total and are related to the topic of the week. Quizzes will open on the following Monday morning and will close on the following Tuesday, at 11:59 pm. This will give you more than 24 hours to complete them. You will be allowed two attempts before submitting them. The completion of the weekly worksheet will help you study for the quizzes.

#### Worksheets

There will be 10 worksheets in total over the semester (approximatively one per week except on Exam deadline weeks). Worksheets are documents that help you walk through class activities and content. They will help you analyze the material and study for the quizzes. Your instructors **WON'T** formally grade your worksheets, it is work that you are doing for yourself, **HOWEVER**, the completion and submission of the worksheet before the deadline each week will make you earn 10 points for each worksheet. Worksheets that are considered poorly completed (Meaning no sentences, many mistakes, a poor understanding of the topic, or partial completion) will

receive either half credit or no credit. Worksheets will be due for submission on Fridays at 11:59 PM. The keys for the worksheet will be available on D2L after the deadline.

# Late work policy

Assignments must be turned in on time to receive credit for the assignment. Make it a habit to double-check that you submitted the correct document to D2L prior to the deadline. Typically, assignments are graded several days after a due date, so if you wait to receive an alert of zero points for a grade entered one week after the deadline, it will be too late to receive any credit for it.

The exception to this policy is that each student is granted **three** assignment extensions as a form of 'late passes':

- o Two 24-hour late passes.
- One 1-week late pass.
- These extensions may be used only for quizzes, worksheets, or homework assignments. They may not be used for Exams.
- You are required to send me (Dr. Vanacker) an email telling me you wish to use a late pass, and which late pass.
- You are advised to save free extensions for an unanticipated event that prevents you from submitting on time.
- You may not take back a previously used late pass to use on a new assignment.

\*\*\* You may not show an instructor the time it was last modified on your computer to receive credit for any assignment. \*\*\*

# <u>Tentative summer semester lecture schedule</u> (schedule subject to change at professor's discretion):

<b>Week 1</b> May 15-19	Course introduction (Module 1) and Organization of the Nervous system (Module 2)
Week 2 May 22-26	Organization of the Nervous system (Module 2)
Week 3 May 29-Jun 2	Perception and experience (Module 3)
Week 4 Jun 5-Jun 9	Visual Perception (Module 4)
Week 5 Jun 12-Jun 16	Learning and Memory (Module 5)  EXAM I on Part I
Week 6 Jun 19-Jun 23	Drug addiction and reward (Module 6)
Week 7 Jun 26-Jun 30	Drug addiction and reward (Module 6) continued and Biology of Sex and Gender (Module 7)
Week 8 Jul 3-Jul 7	Sex and Gender (Module 7)

Week 9 Jul 10-Jul 14	Maintaining internal state – s	special focus on energy balance

(Module 8)

**EXAM II on Part II** 

**Week 10** Jul 17-Jul 21 Emotions – fear, aggression and violence (Module 9)

Week 11 Jul 24-Jul 28 Emotions – fear, aggression and violence (Module 9) and

Emotions – Stress (Module 10)

Week 12 Jul 31-Aug 4 Emotions – Stress (Module 10)

Week 13 Aug 7-Aug 11 Intelligence and Cognitive functioning (Module 10)

Week 14 Aug 14-Aug 18 Intelligence and Cognitive functioning (Module 10)

FINAL WEEK → EXAM III on Part III

# **Diversity and Inclusivity Statement:**

Though science strives to be objective, much of science is historically built on a small subset of privileged voices. It is important to acknowledge that there may be biases in the material due to the lens with which it was written and that we can all point it out if recognizable to us.

In this class, we cover topics that can be sensitive for some of us, such as mental health, health conditions, neurological disorders, gender identity, sex, addiction, agression and so forth. My approach to these topics is based on biology and scientific publications. You should feel free to let me know if some topics may be particularly triggering for you.

My goal is to create an environment that allows students to question and to develop their critical mind in an inclusive, respectful and trustful manner. Because I can't do this alone, I ask you help me accomplish this by respecting and honoring the diversity of your classmates. If something said in class (by anyone including me/your instructor) makes you feel uncomfortable or concerned, I would appreciate this being brought to my attention. Please, keep in mind that learning about diverse perspectives and identities is a process. Everybody can make mistakes and learn from it.

If you would like to be addressed by a preferred/alternate name or gender pronoun, please inform me and I will do my utmost to honor your request. I prefer Dr. Vanacker, and my pronouns are she/her/hers.

# Accommodations for students with disabilities:

If you have a need for disability-related accommodations or services, please inform the Resource Center for Persons with Disabilities (RCPD) and request documentation that supports accommodation needs: Get Started | MSU - Resource Center for Persons with Disabilities. Reasonable and effective accommodation and services will be provided to students if requests are made in a timely manner, with appropriate documentation, in accordance with federal, state, and University guidelines (ex: time accommodation for exams). If you have concerns regarding this topic, please contact the faculty member outside of class. Please explore the following links for help:

Financial aid: <u>Students with Disabilities | Office of Financial Aid | Michigan State University (msu.edu)</u>

Resource center for persons with disabilities: <u>Welcome | MSU - Resource Center for Persons</u> with Disabilities

# Sexual misconduct:

Michigan State University is committed to fostering and maintaining a safe and healthy academic, work, and living environment, which safeguards the applicable due process rights of all NMU Community Members, including Complainants and Respondents. Prohibited Conduct is inconsistent with the standards and ideals of the MSU community. MSU will take prompt and suitable action to investigate and stop Prohibited Conduct; prevent its recurrence; and, as appropriate, remedy its effects. As a teacher, I am designated as Campus Reporter by MSU and must report, by policy, incidents of Prohibited Conduct observed as well as incidents reported to me.

The Office of Institutional Equity (OIE) is responsible for enforcement of the university's policy, while the MSU Police Department handles the criminal investigation.

Sexual misconduct policy at MSU: Relationship Violence and Sexual Misconduct Commitment – MSU Police and Public Safety

# **Academic Integrity**:

- Cheating and plagiarism on any assignment or exam will not be tolerated. This includes
  the use of online sources for answers to quiz and exam questions. Evidence of cheating
  or plagiarism is considered academic misconduct and will result in a zero (0) score on
  the assigned work, referral to the Dean of Students office for disciplinary action, and the
  submission of an Academic Dishonesty Report (ADR). Please make sure that the work
  you submit is your own work.
- Sharing documents and resources obtained in NEU402 (worksheets, quizzes, exam questions, keys, slides, ...) with institutions, companies and websites is also not acceptable. This is a violation of intellectual property and academic misconduct. Students posting documents online will be traced back (it is very easy to do so). They will receive 0 credit for all shared assignments, may receive extra penalty grade according to the severity of the misconduct, and will receive an Academic Dishonesty Report (ADR).

# Spartan Code of Honor:

The Spartan Code of Honor states,

"As a Spartan, I will strive to uphold values of the highest ethical standard. I will practice honesty in my work, foster honesty in my peers, and take pride in knowing that honor is worth more than grades. I will carry these values beyond my time as a student at Michigan State University, continuing the endeavor to build personal integrity in all that I do."

In addition, Article 2.III.B.2 of the Student Rights and Responsibilities (SRR) states that "The student shares with the faculty the responsibility for maintaining the integrity of scholarship, grades, and professional standards." This course adheres to the policies on academic honesty as specified in the General Student Regulations, Protection of Scholarship and Grades; the all-University Policy on Integrity of Scholarship and Grades; and Ordinance 17.00, Examinations. (See <a href="Spartan Life: Student Handbook and Resource Guide opens in new window">Spartan Life: Student Handbook and Resource Guide opens in new window</a> and/or the MSU Web site: msu.edu opens in new window.)

Therefore, unless authorized by your instructor, you are expected to

- complete all course assignments, including homework, lab work, quizzes, tests and exams, without assistance from any source.
- develop original work for this course; therefore, you may not submit course work you completed for another course to satisfy the requirements for this course.
- not view unauthorized posts by others to sharing websites to complete any course work in this course.

Students who violate MSU academic integrity rules may receive a penalty grade, including a failing grade on the assignment or in the course. Contact your instructor if you are unsure about the appropriateness of your course work. (See also the <u>Academic Integrity opens in new window web page.)</u>
