Assistant/Associate Professor Position in Physiology at Michigan State University

The Department of Physiology at Michigan State University (http://www.psl.msu.edu/) invites applications for a nine-month tenure track position at the assistant or associate professor level. We seek applicants whose research integrates bench science, novel computational approaches and large-scale datasets (e.g. metabolomics, systems biology, genomics, epigenetics, modeling, etc.) to the study of disease. Research programs focused on cancer, cardiovascular, musculoskeletal, neurophysiologic and metabolic diseases are of particular interest, and would build upon current departmental strengths in these areas. The ideal applicant will be an outstanding investigator with exceptional promise and proven record of research achievement, with the ability to attract funding in their research area and who will contribute to the highly interactive and collaborative Physiology department.

Applicants should hold a Ph.D., M.D. or equivalent degree with relevant postdoctoral experience. The successful candidate would be responsible for having and/or establishing a nationally recognized, federally funded research program, supervising graduate students, and participating in teaching. Laboratory space, start-up funds and salary will be competitive and commensurate with academic rank and experience.

Applicants should apply online at https://jobs.msu.edu/(Faculty/Academic Staff, posting 0187). Application should include a cover letter, current curriculum vitae, a three page statement of research and a one page statement of teaching philosophy along with the names of three or more references who can evaluate their accomplishments and potential for research and teaching.

Review of applications will begin November 1, 2014 and will continue until the position is filled. Questions about this position should be directed to Dr. Robert Wiseman, Search Committee Chair.

MSU is an Affirmative Action, Equal Opportunity Employer, and is committed to achieving excellence through a diverse workforce. The university actively encourages applications and/or nominations of women, persons of color, veterans, persons with disabilities.
